Onesimus Director — Backup Throughput Benchmark

Host: WS-JOERG.intranet.bernau.family   OS: Linux-6.12.74+deb13+1-amd64-x86_64-with-glibc2.41
CPU: AMD Ryzen 9 9950X 16-Core Processor   RAM: 60.4 GB   Arch: x86_64

```
FileSet: /usr/bin, /usr/sbin, /usr/share
Files: 166,733   Directories: 15,091   Total size: 4.03 GB
```

Test conditions: Both Directors ran sequentially (never parallel) on the same host, same config, same catalog DB, same FD/SD. No other applications were running during the test.

	C++ Director	Rust Director	Delta
JobId			
Status	T	T	
Files	181,887	0	
Data (MB)	12,383	12,373	
Duration (s)	40.4	68.5	0.6x
Avg Throughput	306.5 MB/s	180.6 MB/s	0.6x
